Backend Work - Dev Assignment

NOTE: We can't have anyone just take on one use case since we don't have that many devs. Even if the management works on the use cases it's not possible to assign just 1 use case. Also please take all the use cases that are similar: for instance, there are 3 use cases of enter membership and you need to take all 3 and not just 1. Since the work is similar.

green means finished, yellow means in-progress

Use Case	Dev Working on the Use Case	Expected Deadline (management)	Expected Deadline (from dev perspective)	QA person to test this use-case	Deadline for QA test
remove item	Arie	6th		Sankalp	
add item by text search	Bartu	8th		Samantha
